

# SPEAKER/VENDOR RFP

New and innovative technology solutions offer great promise to improve quality of care while reducing health care costs. Technology has already transformed our lives and now it is time for technology to transform the experience of aging.

Fortunately, many of these technology solutions are available now, and new ones are being developed every day. Help us shape the programming for our first ever Technology Summit on August 6, 2013. The Indiana Assisted Living Association (INALA) & LeadingAge Indiana have joined forces to present an exciting program for aging services' providers, which will showcase trends in the industry that illustrate how technology can improve health care, preserve independence, and ensure quality of life for seniors.

For the purposes of the INALA & LeadingAge Indiana Technology Summit, we have identified Five Categories of Technology Solutions in Aging Services:

1. **Infrastructure technologies** – wireless networking; hand-held devices; area-wide networks to connect staff; technologies designed to assist in process management.
2. **Safety technologies** – personal emergency response systems; electronic call systems; fall detectors.
3. **Health and wellness technologies** – telehealth devices; medication dispensers; remote monitoring sensors; telecoaching; and telemedicine for rural health care.
4. **Documentation** technologies – electronic health records, quality of life measurement tools; point-of-care systems; clinical care tracking software.
5. **Social networking technologies** – computer and internet training programs for seniors; secure social networks for connecting seniors with family and friends; social gaming technologies; cognitive brain fitness software; virtual senior center.

Here is how you can become a part of our Inaugural Technology Summit:

1. We are looking for members to tell their innovative technology stories as part of a panel. Each member will have 20 minutes to share their story. We encourage you to partner with your vendor to present the story. Each story will need to fall within one of the five identified Technology Solution Categories (**Infrastructure technologies; Safety technologies; Health and wellness technologies; Documentation; and Social networking technologies**). We are looking for a variety of members from Assisted Living to Nursing Homes.
2. We are looking for vendors (limited to 10) to showcase their innovative technology solutions as part of Tech Showcase. Each vendor must provide a product or service that falls within one of the five identified Technology Solution Categories (**Infrastructure technologies; Safety technologies; Health and wellness technologies; Documentation; and Social networking technologies**).

Please plan to join us on August 6<sup>th</sup> for a glimpse the future of aging services where integrated health planning and prevention take place and where technology plays a lead role. [Click here](#) to submit your technology story or [click here](#) to showcase your product or service as part of the Tech Showcase.

# TECH Showcase Application

2013 Technology Summit August 6, 2013

Embassy Suites North | Indianapolis, IN
